History of the Lumber Market from January 1, 1918, to June 1, 1923

The period covered by the dates above enumerated mark one of the most interesting eras in entire lumber annals, beginning with a period when this Nation was a participant with European Allied countries in the World War, going thru the last year of that war and proceeding thru the subsequent scarcity of all products of civilized life with its riot of prices at a height which had never been conceived, when all factories and workmen were pushed harder than during the fever of war-times until wants were fairly well satisfied and the expected realized, which, although somewhat anticipated, acted as a restraining force to further enlargements of industry and increase of values.

We see lumber advancing from the beginning of this period, especially lumber used in the manufacture of Maple Flooring and similar products, from a base of \$30.00 per M for 4/4 #1 Common, \$25.00 for #2 and \$23.00 for #3 to \$122.00 per M for the #1 Common, \$82.00 for the #2 and \$37.00 for the #3 in June 1920, and to recede from this pinnacle by the end of 1921 to \$75.00 per M for the #1 Common, \$45.00 for the #2 and \$38.00 for the #3, and by October 1921, \$40.00 per M for the #1 Common, \$24.00 for the #2 and \$17.00 for the #3; to advance slightly in June of the following year to \$52.00 for the #1 Common, \$32.00 for the #2 and \$22.00 for the #3 and to gradually advance from these prices to \$60.00 per M for the #1 Common, \$40.00 for the #2 and \$25.00 for the #3 of this year.

[fol. 5424] During the above period it is very interesting to note the cost of production of Maple Flooring lumber and we have taken as a basis of this cost the minimum wage paid in both the mill and woods departments of representative saw mills in the district of the Northern Peninsula of Michigan. At the beginning of this period, Jan. 1, 1918, common labor at the sawmill was receiving \$2.50 per day and woods labor was receiving an average of \$40.00 per month and keep. However, in the case of the mill labor no keep is included.

We note that saw mill labor advanced April 1, 1918 to \$2.75 and August 1st to \$2.90; woods labor showed no advance until August 1st and was advanced to \$45.00 and again on Oct. 1st, to \$50.00 per month, this rate being held until February 1st, 1919, at which time the sawmill labor had reached \$3.00 per day. In June 1919 the sawmill labor was getting \$3.25 per day and the woods labor \$45.00 per month. At the end of this year, 1919, however, woods labor had reached \$55.00 per month and sawmill labor \$3.75 per day. We see a steady advance from this point, in both sawmill and woods labor, until Dec. 1, 1920, when sawmill labor had reached the hitherto unheard-of rate of \$5.00 per day for common labor and woods labor \$75.00 per month, which is the peak and highest wages ever paid in this district for labor. From this point a decline is noticed somewhat gradual and Jan. 1 1922 sees sawmill labor at \$2.50 per day and woods labor \$26.00 [fol. 5425] per month and keep. It advanced, however, until by the end of the year, on account of shortage of men, woods labor was receiving \$40.00 per month and mill labor \$3.00 per day from which point, during 1923, mill labor is advanced to \$3.25 per day and woods labor to from \$50.00 to \$60.00 per month. According to the records kept by the J. W. Wells Lumber Co. the peak seems to have been reached both insofar as net returns on lumber are concerned and the highest wages paid for men both at mill and in the woods department, in Sept. 1920. This has special reference also to the net rates for Maple Flooring values, following very closely the cost of production and the law of supply and demand.
